

A new generation of flat roofing is taking over the property market and it goes above and beyond anything else that has come before it. Fiberglass roofing exceeds all the benefits of previous roofing materials; it is the answer to leaking felt roofs, it is the permanent solution to your flat roofing problem, and it even allows for easy installation. For many of you who do non-stop [home repairs](#) after you purchase your first home on contract for deed, this concept might be extremely useful.

If you've never heard of fiberglass roofing, or (even worse) you've heard of it but never considered it for your garage, why not? This roofing system has been rapidly growing in popularity all over the country and it's not hard to see why. In this article we're going to be looking at what a fiberglass roof is and why you need one.

## **A Few Facts About Fiberglass Roofing**

fiberglass roofing is the next best thing, it's cool, it's in, and there are so many reasons homeowners love it! But what exactly is fiberglass roofing? Well, fiberglass roofing is a lightweight but strong material that is resistant to the weather, temperature changes, corrosion, and damage. Not only can fiberglass roofing be easily moulded to suit any roof shape, but it is also extremely easy to maintain.

## **Where Did Fiberglass Originate from?**

fiberglass was a material first used in the marine industry to build boats, but has since proved its versatility in numerous areas, including construction and flat roofing! This amazing material has benefitted the construction industry in so many ways and since it's potential has been recognized, it has been transforming households across the country.

## **Quick Fiberglass Roofing Tips**

Another really great thing about fiberglass roofing is that you don't necessarily have to pay for installation costs! Instead, you can now get your very own fiberglass roofing kit and follow the [fiberglass roofing process](#) online to lay your very own garage roof. But before you make a start, here are a few quick fiberglass roofing tips:

- Be sure to check the weather forecast before starting to lay a fiberglass roof as it is essential it is done in dry weather conditions.
- Also, do not install your fiberglass roof when it is too cold as the resin and topcoat will not cure properly - leaving you with a badly installed roof.

- If, while you're installing your fiberglass roof, it starts to rain - stop straight away and cover the roof to avoid any damage.

These are just a few quick tips, but they will save you plenty of time and ensure you end up with a beautifully completed roof that looks like its been laid by a professional.

## What are the Benefits?

So, you're thinking about installing fiberglass benefits and while we've explained a few of the basics, why exactly do you need a fiberglass roof? What are the benefits? Well, below are some of the most popular benefits of fiberglass roofing that help explain why this product has spread so rapidly in popularity over the years.

**Fiberglass Roofing is Lightweight:** There is not much that is better than installing a new roof that is extremely lightweight. Many roofing materials are heavy and difficult for roofers or homeowners to carry and install. What's more, the weight of roofing products can be a safety concern for many. So, the benefit of a lightweight roofing material like fiberglass cannot be understated.

**Fiberglass Roofing is Durable:** When it comes to a good roofing material, we all want something that is durable. And one of the main reasons homeowners are choosing fiberglass is because it has a reputation for strength and durability. What's more, if you hire a professional roofer to do all the hard work for you, your roof will remain durable for many years to come.

**Fiberglass Roofing has No Joints:** Joints are a problem when it comes to roofing and can cause issues such as cracking, leaking, [water damage restoration](#), and more. One of the significant benefits is that it has no joints - making it a fantastic roofing material to apply in liquid form. This allows for a seamless finish unlike any other.

**Repairs are Made Easy:** This roofing is fantastic for easy repairs. This material is not only versatile but it allows for repairs to be carried out easily and to a very high standard without interrupting the daily routine of your life. When it comes to roofing, what could be better than that?

## Fiberglass Roofing Looks Great

Probably the main reason people purchase this roofing is that it looks fantastic. This roofing

material is very aesthetically pleasing and provides your garage with a level of style other homes on your street have yet to achieve.

## **How Long Does Fiberglass Roofing Last?**

So, the final reason you need to purchase and install this roofing on your garage is that it lasts a very long time. In fact, if professionally fitted by roofing experts, this roofing will last for at least 25 years! That's phenomenal and certainly cuts down home maintenance costs significantly.
